WORK EXPERIENCE

Founding Engineer Comarketer.dev

07/2025 - Present

Bangalore - India

Achievements/Tasks

- Engineered an AI-driven website builder that generates production-ready sites from natural language, serving **7,000+ users** with **~1,200 monthly sign-ups**.
- Secured 2nd place** at OSS4AI AI Agents Hackathon, hosted by the **world's largest AI agent community (r/AI_Agents, 200k+ members)**.
- Built a unified Visual, Code, and AI editor system, where users can directly edit site elements visually or customize via code and AI commands.
- Architected one-click Vercel deployment pipeline automating build, optimization, hosting, and end-to-end SEO (schema/robots/sitemap/JSON-LD).

Software Developer Galvinus.com

05/2025 - 07/2025

Silchar - India

Achievements/Tasks

- Built a scalable, event-driven notification system for reliable multi-channel delivery (email, SMS, in-app), intelligently routing messages based on user online/offline status.
- Implemented a robust RBAC system for Super Admins to manage roles and permissions across e-commerce modules like Orders, Products, and Shipping.

Software Developer intern Hire22.ai

08/2024 - 02/2025

Bangalore - India

Achievements/Tasks

- Developed an AI-powered resume builder that supports LinkedIn import, resume parsing, smart recommendations, and multiple templates.
- Integrated secure cloud storage for managing and sharing multiple resume versions via secure links, with password protection and instant PDF downloads.

ACHIEVEMENTS

International Hackathon Winner CryptoLens

10/2024 - 11/2024

International

Achievements

- Co-created CryptoLens, a Web3 platform for tracking on-chain assets and portfolio performance.
- Won the QuickNode Build-On Hackathon (250+ teams), earning \$500 for building a scalable, innovative blockchain solution.

PROJECTS & LEADERSHIP

PWxSEO Audit Platform (10/2025 - 11/2025)

- Built for Physics Wallah** (unicorn EdTech) as internal tool to streamline technical SEO workflows for high-traffic course pages.
- Audits sitemap.xml, robots.txt, schema gaps, canonical tags, 4xx/3xx errors, internal/external links, and image alt text coverage.
- Generates Lighthouse performance, accessibility, and SEO scores with AI-driven, easy-to-follow improvement recommendations.
- Optimize URLs, title/description and schema markup additions for maximum search impact.

TEDxAU (Tech Co-Lead) (06/2025 - 08/2025)

- Led a team of 4 devs to develop and deploy the TEDxAU event platform on Vercel for 300+ attendees.
- Architected the core infrastructure and UI standards, ensuring a pixel-perfect, responsive interface.
- Coordinated directly with the Design and Marketing teams to translate creative ideas into code.
- Managed the full lifecycle and personally optimized Core Web Vitals for maximum performance.

Nova – The AI-Powered Lib (02/2025 - 03/2025)

- AI-Powered Code Optimization functions lets users optimize, refactor, and enhance their codebase with AI-driven functions.
- Generates automated documentation, test cases, comments, and README files.
- Smart Function Chaining with .pipe() Allows users to chain multiple transformations seamlessly.
- Added an optional backup feature that lets users save snapshots before making changes, allowing easy rollbacks if needed for safety and version control.

CERTIFICATES

100xdevs (08/2024 - 11/2024)

Completed 100xDevs Program, mastering full-stack development, scalable system design, and real-world project deployment. 🏆

Linux Unhatched by Cisco (04/2025 - 05/2025)

Completed Cisco Linux Unhatched, learning command line, file management, shell scripting, and package management.
